Board of Retirement Contra Costa County Employees' Retirement Association 1335 Willow Way, Suite 221 Concord, CA 94520

Dear Board Members:

We are pleased to submit this Actuarial Valuation and Review as of December 31, 2011. The report summarizes the actuarial data used in the valuation, establishes the funding requirements for the fiscal year beginning July 1, 2013 and analyzes the preceding year's experience.

The census information on which our calculations were based was prepared by the CCCERA and the financial information was provided by the Association's staff. That assistance is gratefully acknowledged. The actuarial calculations were completed under the supervision of John Monroe, ASA, MAAA, Enrolled Actuary.

This actuarial valuation has been completed in accordance with generally accepted actuarial principles and practices. To the best of our knowledge, the information supplied in this actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board of Retirement are reasonably related to the experience of and the expectations for the Plan.

We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein.

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

THE SEGAL COMPANY

By:

Paul Angelo, FSA, EA, MAAA, FCA Senior Vice President and Actuary

John Monroe, EA, ASA, MAAA Vice President and Associate Actuary

PURPOSE AND SCOPE

This report has been prepared by The Segal Company to present a valuation of the Contra Costa County Employees' Retirement Association (CCCERA) as of December 31, 2011. The valuation was performed to determine contribution rates that, in combination with current assets, are sufficient to provide the prescribed benefits. The contribution rate requirements presented in this report are based on:

- > The benefit provisions of the Retirement Association, as administered by the Board;
- > The characteristics of covered active members, terminated members, and retired members and beneficiaries as of December 31, 2011, provided by the Association's staff;
- ➤ The assets of the Plan as of December 31, 2011, provided by the Association's staff;
- > Economic assumptions regarding future salary increases and investment earnings; and
- > Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

One of the general goals of an actuarial valuation is to establish contributions that fully fund the system's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation of active members. Annual actuarial valuations measure the progress toward this goal, as well as test the adequacy of the contribution rates.

The actuarial valuation required for the Contra Costa County Employees' Retirement Association has been prepared as of December 31, 2011 by The Segal Company. In preparing this valuation, we have employed generally accepted actuarial methods and assumptions to evaluate the Association's assets, liabilities and future contribution requirements. Our calculations are based upon member data and financial information provided to us by the Association's staff. This information has not been audited by us, but it has been reviewed and found to be reasonably consistent, both internally and with prior years' information.

The contribution requirements are determined as a percentage of payroll. The Association's employer rates provide for both normal cost and a contribution to amortize any unfunded or overfunded actuarial accrued liabilities. The remaining balance of the Association's unfunded actuarial accrued liability (UAAL) through December 31, 2007 is being amortized over a decreasing period with 11 years remaining as December 31, 2011. Any change in the UAAL that arises at each valuation after December 31, 2007 is amortized over its own separate declining 18-year period.

We recommend that the rates calculated in this report be adopted by the Board for the fiscal year that extends from July 1, 2013 through June 30, 2014.

SIGNIFICANT ISSUES IN VALUATION YEAR

The following key findings were the result of this actuarial valuation:

- Ref: Pg. 84 Ref: Pg. 73
- > The ratio of the valuation value of assets to actuarial accrued liabilities decreased from 80.3% to 78.5%. The Association's UAAL has increased from \$1.312 billion to \$1.489 billion. This increase is primarily due to an investment return on actuarial value (i.e. after smoothing) that fell short of the 7.75% assumed rate. A reconciliation of the Association's UAAL is provided in Section 3, Exhibit I.
- Ref: Pg. 50
- > The aggregate employer rate calculated in this valuation (before considering any employer subvention of member rates or member subvention of employer rates) has increased from 34.49% of payroll to 37.87% of payroll. This increase is primarily due to the investment loss mentioned above. A complete reconciliation of the Association's aggregate employer rate is provided in Section 2, Subsection D, see Chart 16.
- Ref: Pg. 51
- > The aggregate member rate calculated in this valuation (before considering any employer subvention of these rates or member subvention of employer rates) has decreased from 11.00% of payroll to 10.98% of payroll. A complete reconciliation of the Association's aggregate member rate is provided in Section 2, Subsection D, see Chart 17.
- > The Summary of Key Valuation Results (page v) and the employer and member rate reconciliations (Charts 16 and 17) do not reflect any employer subvention of member rates or member subvention of employer rates. The Summary of Contribution Rates with Employer Subvention (page vii) is an illustration of what the rates would be if all employers (except for Safety Districts) subvented 50% of the member basic rates. The detailed rate tables (Charts 14 and 15) also include the 50% subvention line (except for Safety Districts).
- ➤ As in the prior year valuation report, separate employer contribution rates are shown in Charts 14 and 15 for members based on membership dates before and on or after January 1, 2011. However, the average employer contribution rates shown on pages v and vii are based on all members regardless of their membership date.

Ref: Pg. 5

- As detailed on page 5 of this valuation report, the total unrecognized investment loss as of December 31, 2011 is about \$389 million as compared to \$329 million in the previous valuation. This investment loss will be recognized in the determination of the actuarial value of assets for funding purposes in the next few years. This means that if the Association earns the assumed rate of investment return of 7.75% per year (net of expenses) on a **market value** basis, then the deferred losses would be recognized over the next few years as shown in the footnote in Chart 7.
- > The deferred losses of \$389 million represent about 8% of the market value of assets. Unless offset by future investment gains or other favorable experience, the recognition of the \$389 million market losses is expected to have an impact on the Association's future funded ratio and contribution rate requirements. This potential impact may be illustrated as follows:
 - If the deferred losses were recognized immediately in the valuation value of assets, the funded percentage would decrease from 78.5% to 72.9%.
 - If the deferred losses were recognized immediately in the valuation value of assets, the aggregate employer contribution rate would increase from 37.9% to about 42.3% of payroll.
- > This is the first valuation that includes actual valuation data for members with membership dates on or after January 1, 2011. These members are subject to the amended policy that determines which pay items are considered compensation for retirement purposes. Cost groups #5, #10 and #12 still do not contain any members with membership dates on or after January 1, 2011. Consistent with the methodology that was applied in the previous valuation for <u>all</u> cost groups, for those three cost groups we have continued to assume that the demographics of members with membership dates on or after January 1, 2011 are the same as the demographics of members with membership dates before January 1, 2011.
- > The actuarial valuation report as of December 31, 2011 is based on financial information as of that date. Changes in the assets subsequent to that date, to the extent that they exist, are not reflected. Declines in asset values will increase the actuarial cost of the plan, while increases will decrease the actuarial cost of the plan.
- > The last actuarial experience study covered the period from January 1, 2007 through December 31, 2009. We anticipate performing another actuarial experience study during the first half of 2013. As part of this study, recommendations for changes in actuarial assumptions may be made. For each of CCCERA's demographic actuarial assumptions, these recommendations will generally be based on a comparison of actual experience versus that which was expected to occur.

<u>Impact of Future Experience on Contribution Rates</u>

Future contribution requirements may differ from those determined in the valuation because of:

- > Differences between actual experience and anticipated experience;
- > Changes in actuarial assumptions or methods;
- > Changes in statutory provisions; and
- > Differences between the contribution rates determined by the valuation and those adopted by the Board.

All Categories Combined	7.92%	\$52,762,809	7.93%	\$54,544,276

Based on projected payroll as of each valuation date shown. These rates include a 50% employer subvention of members' basic contributions for all employers except Safety Districts. Note that recently negotiated MOU's for County General members no longer include the 50% employer subvention. The rates do not include any member subvention of employer contributions. As of December 31, 2011, for most Safety Tier A employers, Safety members contribute up to an extra 9% of compensation (depending on their MOU) that reduces the employer's contribution rate. The rates shown are averages based on all members regardless of their membership date.

Note: Pages 18 and 19 contain a summary that shows which employers are in each cost group.

SECTION 1: Valuation Summary for the Contra Costa County Employees' Retirement Association

	December 31, 2011	December 31, 2010	Percentage Change
Active Members:

Vested Terminated Members:			
Number of terminated vested members ⁽¹⁾	2,214	2,231	-0.8%
Average age	46.7	46.1	N/A
Summary of Financial Data:			
Market value of assets	\$5,052,289,458	\$5,027,157,199	0.5%
Return on market value of assets	1.76%	13.35%	N/A
Actuarial value of assets	\$5,441,119,691	\$5,355,971,152	1.6%
Return on actuarial value of assets	2.78%	1.82%	N/A
Valuation value of assets	\$5,426,719,066	\$5,341,821,711	1.6%
Return on valuation value of assets	2.77%	1.80%	N/A

⁽¹⁾ Includes 834 nonvested terminated members as of December 31, 2011 and 806 as of December 31, 2010.

A. MEMBER DATA

The Actuarial Valuation and Review considers the number and demographics of covered members, including active members, vested terminated members, retired members and beneficiaries. This section presents a summary of significant statistical data on these member groups.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A, B, C and D.

A historical perspective of how the member population has changed over the past ten valuations can be seen in this chart.

CHART 1
Member Population: 2002 – 2011

Year Ended December 31	Active Members	Vested Terminated Members ⁽¹⁾	Retired Members and Beneficiaries	Ratio of Non-Actives to Actives
2002	9,611	1,067	5,619	0.70
2003	9,476	1,248	5,936	0.76
2004	9,358	1,517	6,118	0.82
2005	9,205	1,731	6,437	0.89
2006	9,210	1,919	6,646	0.93
2007	9,421	2,008	6,911	0.95
2008	9,385	2,153	7,012	0.98
2009	8,938	2,209	7,292	1.06
2010	8,811	2,231	7,559	1.11
2011	8,629	2,214	8,085	1.19

⁽¹⁾ Includes nonvested terminated members.

Active Members

Plan costs are affected by the age, years of service and compensation of active members. In this year's valuation, there are 8,629 active members with an average age of 46.2, average years of service of 10.7 years and average compensation of \$77,227. The 8,811 active members in the prior valuation had an average age of 46.6, average service of 11.1 years and average compensation of \$78,021.

Among the active members, there were none with unknown age or service information.

Inactive Members

In this year's valuation, there were 2,214 members with a vested right to a deferred or immediate vested benefit or entitled to a return of their employee contributions versus 2,231 in the prior valuation.

These graphs show a distribution of active members by age and by years of service.

CHART 2
Distribution of Active Members by Age as of December 31, 2011

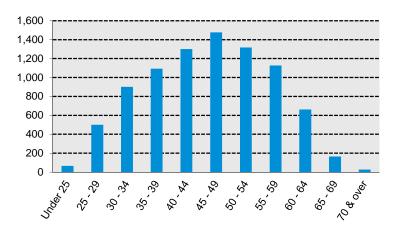

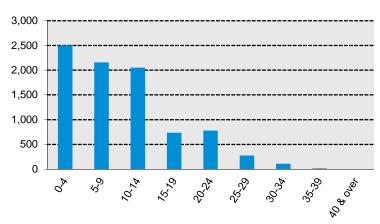

CHART 3

Distribution of Active Members by Years of Service as of December 31, 2011

Retired Members and Beneficiaries

As of December 31, 2011, 6,880 retired members and 1,205 beneficiaries were receiving total monthly benefits of \$27,336,013. For comparison, in the previous valuation, there were 6,390 retired members and 1,169 beneficiaries receiving monthly benefits of \$24,553,122.

These graphs show a distribution of the current retired members and beneficiaries based on their monthly amount and age, by type of pension.

CHART 4

Distribution of Retired Members and Beneficiaries by Type and by Monthly Amount as of December 31, 2011

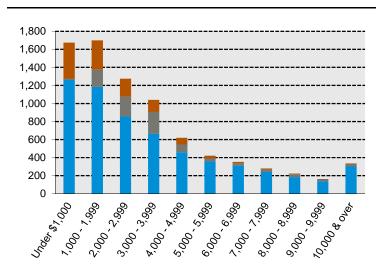

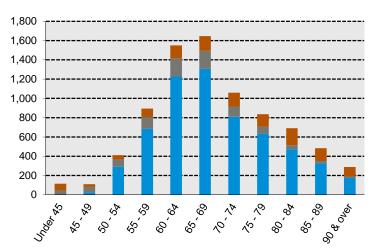

CHART 5
Distribution of Retired Members and Beneficiaries by Type and by Age as of December 31, 2011

B. FINANCIAL INFORMATION

Retirement plan funding anticipates that, over the long term, both contributions and net investment earnings (less investment and administrative fees) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. The adjustment toward market value shown in the chart is the "non-cash" earnings on investment implicitly included in the Actuarial Value of Assets. Additional financial information, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits E and F.

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board of Retirement has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuation is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

The chart depicts the components of changes in the actuarial value of assets over the last ten years. Pension Obligation Bonds in the amount of \$319 million for 2003, \$153 million for 2006 are included in the contributions. Also included are UAAL prepayments of \$8.6 million for 2006 and \$3.0 million for 2007.

■ Adjustment toward market value

■Benefits paid

■ Net interest and dividends

■ Contributions

Note: Results may not add due to rounding.

The market value, actuarial value and valuation value of assets are representations of the Plan's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets, but with less volatility. The valuation value of assets is the actuarial value, excluding any non-valuation reserves.

The valuation value of assets is significant because the Plan's liabilities are compared to this measure of its assets to determine what portion, if any, remains unfunded. Amortization of the unfunded liability is an important element in determining the contribution requirement.

This chart shows the change in the relative values of market value, actuarial value and valuation value of assets over the past ten years.

CHART 9
Relative Values of Market Value, Actuarial Value and Valuation Value of Assets for Years
Ended December 31, 2002 – 2011

C. ACTUARIAL EXPERIENCE

To calculate the required contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term

development and that, over the long term, experience will return to the original assumptions. For contribution requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

The total loss is \$194.8 million, \$264.6 million loss from investments and \$69.8 million gain from all other sources. The net experience variation from individual sources other than investments was 1.0% of the actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

This chart provides a summary of the actuarial experience during the past year.

CHART 10 Actuarial Experience for Year Ended December 31, 2011

1.	Net gain/(loss) from investments*	\$(264,596,532)
2.	Net gain/(loss) from other experience**	69,839,958
3.	Net experience gain/(loss): $(1) + (2) + (3)$	\$(194,756,574)

^{*} Details in Chart 11

^{**} See Section 3, Exhibit I. Does not include the effect of plan or assumption changes, if any.

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on the Plan's investment policy. For valuation purposes, the assumed rate of return on the actuarial value of assets during 2011 was 7.75%. The actual rate of return on Actuarial Value for the 2011 Plan Year was 2.78%.

Since the actual return for the year was less than the assumed return, the Plan experienced an actuarial loss on the Actuarial and Valuation Value of Assets during the year ended December 31, 2011.

This chart shows the gain/(loss) due to investment experience.

CHART 11

Investment Experience for Year Ended December 31, 2011 – Market Value, Actuarial Value and Valuation Value of Assets

	Market Value	Actuarial Value	Valuation Value
Actual return	\$88,042,268	\$148,058,548	\$146,988,614
2. Average value of assets	4,995,702,195	5,324,516,148	5,310,776,082
3. Actual rate of return: $(1) \div (2)$	1.76%	2.78%	2.77%
4. Assumed rate of return	7.75%	7.75%	7.75%
5. Expected return: (2) x (4)	387,166,920	412,650,001	411,585,146
6. Actuarial gain/(loss): (1) – (5)	<u>\$(299,124,652)</u>	<u>\$(264,591,453)</u>	<u>\$(264,596,532)</u>

Because actuarial planning is long term, it is useful to see how the assumed investment rate of return has followed actual experience over time. The chart below shows the rates of return on an actuarial, valuation and market value basis for the last ten years. Based upon recommendations previously adopted by the Board, we have maintained the assumed rate of return of 7.75%.

CHART 12
Investment Return – Market Value, Actuarial Value, and Valuation Value: 2002 – 2011

		larket Value Investment Return		l Value nt Return	Valuation Value Investment Return		
Year Ended December 31	Amount	Percent of Assets	Amount	Percent of Assets	Amount	Percent of Assets	
2002	\$(274,820,794)	(10.28%)	\$93,144,770	3.05%	\$227,080,187	8.53%	
2003	599,528,120	23.44%	83,420,012	2.52%	244,215,190	7.41%	
2004	406,427,237	12.27%	136,674,234	3.85%	135,741,405	3.84%	
2005	331,400,271	8.71%	216,618,073	5.74%	215,737,484	5.74%	
2006	603,899,378	14.23%	353,776,306	8.63%	352,838,472	8.64%	
2007	294,694,885	6.03%	522,206,583	11.63%	521,211,436	11.64%	
2008	(1,477,705,765)	(28.35%)	238,397,117	4.73%	237,402,129	4.72%	
2009	736,956,891	19.68%	18,226,933	0.34%	17,021,116	0.32%	
2010	594,637,090	13.35%	95,918,913	1.82%	94,835,030	1.80%	
2011	88,042,268	1.76%	148,058,548	2.78%	146,988,614	2.77%	
Total	\$1,903,059,581		\$1,906,441,489		\$2,193,071,063		
Five-Year Average R	eturn	1.02%		4.01%		4.01%	
Ten-Year Average Return		4.77%		4.41%		5.13%	

Note: Each year's yield is weighted by the average asset value in that year.

Subsection B described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs.

CHART 13

Market, Actuarial and Valuation Value Rates of Return for Years Ended December 31, 2002 - 2011

Actuarial Value

Market Value

Valuation Value

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include:

- > the extent of turnover among the participants,
- > retirement experience (earlier or later than expected),
- > mortality (more or fewer deaths than expected),
- > the number of disability retirements, and
- > salary increases different than assumed.

Please see Exhibit I in Section 3 for a detailed reconciliation of changes in the Unfunded Actuarial Accrued Liability.

D. RECOMMENDED CONTRIBUTION

Employer contributions consist of two components:

Normal Cost

The annual contribution rate that, if paid annually from a member's first year of membership through the year of retirement, would accumulate to the amount necessary to fully fund the member's retirement-related benefits. Accumulation includes annual crediting of interest at the assumed investment earning rate. The contribution rate is expressed as a level percentage of the member's compensation.

Contribution to the Unfunded

Actuarial Accrued Liability (UAAL)

The annual contribution rate that, if paid annually over the UAAL amortization period, would accumulate to the amount necessary to fully fund the UAAL. Accumulation includes annual crediting of interest at the assumed investment earning rate. The contribution (or rate credit in the case of a negative UAAL) is calculated to remain as a level percentage of future active member payroll (including payroll for new members as they enter the Association) assuming a constant number of active members. In order to remain as a level percentage of payroll, amortization payments (credits) are scheduled to increase at the combined annual inflation and "across the board" salary increase rate of 4.25% along with expected payroll. The remaining balance of the December 31, 2007 UAAL is being amortized over a 11-year declining period as of December 31, 2011. Any change in the UAAL that arises at each valuation after December 31, 2007 is amortized over its own separate declining 18-year period.

Employer Contribution Rates

The current employer contribution rates are shown in Charts 14-A for members with membership dates before January 1, 2011 and 14-B for members with membership dates on or after January 1, 2011. The recommended employer contributions are provided on Charts 15-A for members with membership dates before January 1, 2011and 15-B for members with membership dates on or after January 1, 2011. County contribution rates also include the Superior Court.

For the December 31, 2010 valuation, the demographics of members with membership dates on or after January 1, 2011 are assumed to be the same as the demographics of members included in the December 31, 2010 valuation. For the December 31, 2011 valuation, a similar methodology was applied to cost groups #5,

#10 and #12 since those cost groups had no members with membership dates on or after January 1, 2011.

The amortization cost for the UAAL for members with membership dates before January 1, 2011 has been expressed as a percentage of total future payroll, including members with membership dates on or after January 1, 2011. This has been done in order to continue the open group level percent of payroll amortization methodology for the UAAL associated with members with membership dates before January 1, 2011. It is also consistent with the methodology applied when Safety Tier C was implemented.

Member Contributions

Articles 6 and 6.8 of the 1937 Act define the methodology to be used in the calculation of member basic contribution rates for General and Safety members, respectively. The basic contribution rate is determined as that percentage of compensation which if paid annually from a member's first year of membership through the prescribed retirement age would accumulate to the amount necessary to fund a prescribed annuity.

The annuity is equal to:

- ➤ 1/120 of one year Final Average Salary per year of service at age 55 for General Tier 1 and Tier 3 Non-enhanced members
- > 1/100 of one year Final Average Salary per year of service at age 50 for Safety Tier A Non-enhanced members
- > 1/120 of one year Final Average Salary per year of service at age 60 for General Tier 1 and Tier 3 Enhanced members
- > 1/100 of one year Final Average Salary per year of service at age 50 for Safety Tier A Enhanced
- ➤ 1/100 of three year Final Average Salary per year of service at age 50 for Safety Tier C Enhanced members

Member contributions are accumulated at an annual interest rate adopted annually by the Board. Note that recently negotiated MOU's for County General members no longer include the 50% employer subvention of the members' basic contributions. For

illustration purposes only, the rates shown in Charts 14 and 15 <u>include</u> the 50% employer subvention of members' basic contributions for all employers (except for Safety Districts). Districts pay varying portions, up to 100%, of the members' basic contributions on a nonrefundable basis. Members also pay 50% of the cost-of-living benefit. For most Safety Tier A employers, Safety members also subvent a portion of the employer rate, currently up to 9% of compensation (depending on their MOU). This is not reflected in Charts 14 and 15. The age specific contribution rates are provided in Appendix A for members with membership dates before January 1, 2011 and Appendix B for members with membership dates on or after January 1, 2011.

For determining the cost of the basic benefit (i.e. non-COLA component), the cost of this pay element is currently recognized in the valuation as an employer only cost and does not affect member contribution rates. The terminal pay assumptions are only used in establishing cost-of-living member contributions.

Starting with the December 31, 2009 Actuarial Valuation, the Board took action to depool CCCERA's assets, liabilities and normal cost by employer when determining employer contribution rates. The Board action included a review of experience back to December 31, 2002. This did not involve recalculation of any employer rates prior to December 31, 2009. However, it did involve reflecting the separate experience of the employers in each individual cost group back from December 31, 2002 through December 31, 2009. The cost groups are detailed on pages 18 and 19. In addition, the Board action called for a discontinuation of certain cost sharing adjustments for both member and employer contribution rates for General Tier 1 and Safety Tier A. Even under the depooling structure, there are a few remaining cost sharing arrangements. Here is a summary of the cost sharing arrangements that were implemented in the December 31, 2009 Actuarial Valuation:

- Smaller employers (less than 50 active members as of December 31, 2009) were pooled with the applicable County tier. Safety members from the East Contra Costa Fire Protection District were pooled with Safety members of the Contra Costa County Fire Protection District.
- > Due to a statutory requirement, the Superior Court was pooled with the County regardless of how many members the Court has.

Cost Sharing Adjustments

Other Adjustments

➤ UAAL costs are pooled between Cost Group #1 and Cost Group #2 which represent General County and Small Districts for Tiers 1 and 3. UAAL costs are also pooled for Cost Groups #7 and #9 which are Safety County Tiers A and C.

Other adjustments made in the determination of rates are as follows:

➤ Adjustments are made to some UAAL amounts for the County, the Contra Costa County Fire Protection District (CCCFPD) and the Moraga-Orinda Fire District (Moraga) to account for Pension Obligation Bonds (POBs) and any other special contributions that they previously made. These adjustments serve to reduce the UAAL contribution rate for these employers. The outstanding balance of these adjustments as of December 31, 2011 is as follows:

_	County General	Moraga General	CCCFPD Safety
Basic	\$232,195,183	\$408,903	\$66,648,413
COL	\$186,060,332	\$237,323	\$50,829,064

Payroll = \$29,414,049

^{*} These rates include the 50% employer subvention of members' basic contributions (except for Safety District rates).

The employer contribution rates as of December 31, 2011 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

Reconciliation of Recommended Employer Contribution Rate

The chart below details the changes in the recommended employer contribution rate from the prior valuation to the current year's valuation.

CHART 16
Reconciliation of Recommended Average Employer Contribution from December 31, 2010 to December 31, 2011 Valuation

	Contribution Rate*	Estimated Annual Dollar Cost**
Recommended Average Employer Contribution Rate in December 31, 2010 Valuation	34.49%	\$237,107,380
Effect of investment (gain)/loss ⁽¹⁾	3.00%	19,991,824
Effect of difference in actual versus expected contributions due to delay in implementation of contribution rates calculated in 12/31/2010 valuation	0.54%	3,598,528
Effect of lower than expected individual salary increases (2)	(0.87%)	(5,797,629)
Effect of amortizing prior year's UAAL over a smaller than expected projected total salary ⁽³⁾	1.27%	8,463,206
Effect of lower than expected COLA increases ⁽⁴⁾	(0.59%)	(3,931,725)
Effect of net other experience (gains)/losses ⁽⁵⁾	0.03%	(7,094,337)
Total change	<u>3.38%</u>	<u>\$15,229,867</u>
Recommended Average Employer Contribution Rate in December 31, 2011 Valuation	37.87%	\$252,337,247

^{*} These rates do not include any employer subvention of member contributions, or member subvention of employer contributions.

^{**} Based on projected payroll for each valuation date shown.

⁽¹⁾ Return on the valuation value of assets of 2.77% was less than the 7.75% assumed in the valuation.

⁽²⁾ Lower individual salary increases decrease costs.

⁽³⁾ Lower total payroll growth increases the UAAL contribution rate, since the remaining UAAL is amortized over a lower payroll.

⁴⁾ The actual COLAs granted on April 1, 2011 were less than those assumed for some retirees and beneficiaries.

⁽⁵⁾ Other differences in actual versus expected experience including (but not limited to) mortality, disability, withdrawal, retirement and terminal pay experience. Estimated annual dollar cost also reflects change in payroll from prior valuation.

The member contribution rates as of December 31, 2011 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

Reconciliation of Recommended Member Contribution Rate

The chart below details the changes in the recommended member contribution rate from the prior valuation to the current year's valuation.

The chart reconciles the member contribution from the prior valuation to the amount determined in this valuation.

CHART 17 Reconciliation of Recommended Average Member Contribution from December 31, 2010 to December 31, 2011 Valuation

	Contribution Rate*	Estimated Annual Dollar Cost**
Recommended Average Member Contribution Rate in December 31, 2010 Valuation	11.00%	\$75,639,136
Effect of other experience (gains)/losses ⁽¹⁾	<u>-0.02%</u>	(2,441,494)
Total change	<u>-0.02%</u>	<u>\$(2,441,494)</u>
Recommended Average Member Contribution Rate in December 31, 2011 Valuation	10.98%	\$73,197,642

^{*} These rates do not include any employer subvention of member contributions, or member subvention of employer contributions.

^{**} Based on projected payroll for each valuation date shown.

⁽¹⁾ Other differences in actual versus expected experience. Estimated annual dollar cost also reflects change in payroll from prior valuation.

E. INFORMATION REQUIRED BY GASB

Government Accounting Standards Board (GASB) reporting information provides standardized information for comparative purposes of governmental pension plans. This information allows a reader of the financial statements to compare the funding status of one governmental plan to another on relatively equal terms.

Critical information to GASB is the historical comparison of the GASB required contributions to the actual contributions. This comparison demonstrates whether a plan is being funded on an actuarially sound basis and in accordance with the GASB funding requirements. Chart 18 below presents a graphical representation of this information for the Plan

The other critical piece of information regarding the Plan's financial status is the funded ratio. This ratio compares the valuation value of assets of the plan to the liabilities of the plan as calculated under GASB requirements. High ratios indicate a well-funded plan with assets sufficient to cover the Plan's liabilities. Lower ratios may indicate recent changes to benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other changes.

The details regarding the calculations of these values and other GASB numbers may be found in Section 4, Exhibits I, II, and III.

These graphs show key GASB factors.

Net assets at valuation value		\$5,426,719,066		\$5,341,821,711

⁽¹⁾ Equals the sum of additional contribution receivables for the final Paulson Settlement.

EXHIBIT G

Actuarial Balance Sheet

An overview of the Plan's funding is given by an Actuarial Balance Sheet. In this approach, we first determine the amount and timing of all future payments that are projected/anticipated to be made by the Plan for current participants. We then discount these payments at the valuation interest rate to the date of the valuation, thereby determining their present value. We refer to this present value as the "liability" of the Plan.

Second, we determine how this liability will be met. These actuarial "assets" include the net amount of assets already accumulated by the Plan, the present value of future member contributions, the present value of future employer normal cost contributions, and the present value of future employer amortization payments.

Asse	ets	Basic	COLA	Total
1. 7	Total valuation value of assets	\$3,492,909,590	\$1,933,809,476	\$5,426,719,066
2. I	Present value of future contributions by members	\$348,369,081	\$195,949,165	\$544,318,246
3. I	Present value of future employer contributions for:			
((a) entry age normal cost	\$657,898,987	\$186,752,523	\$844,651,510
((b) unfunded actuarial accrued liability	\$1,008,729,572	\$479,863,011	\$1,488,592,583
4.	Total actuarial assets	\$5,507,907,230	\$2,796,374,175	\$8,304,281,405
Liab	vilities			
5. I	Present value of benefits for retirees and beneficiaries	\$2,588,336,304	\$1,679,865,348	\$4,268,201,652
6. I	Present value of benefits for vested terminated members ⁽¹⁾	\$131,777,039	\$50,226,896	\$182,003,935
7. I	Present value of benefits for active members	\$2,787,793,887	\$1,066,281,931	\$3,854,075,818
8.	Total present value of benefits	\$5,507,907,230	\$2,796,374,175	\$8,304,281,405

⁽¹⁾ Includes nonvested terminated members.

As of beginning of year. The annual payment amounts shown for the Special Adjustments represent the credit allocated to the employer to reflect the receipt of the proceeds for Pension Obligation Bonds (POBs) or any other special contributions. These adjustments serve to reduce the UAAL contribution rate for these employers. The cost of debt service associated with the POBs is not reflected in this report.

⁽²⁾ Changes in actuarial assumptions and methods from actuarial experience study.

⁽²⁾ The Board approved changes in actuarial assumptions. Terminal pay assumptions are now based on cost groups.

⁽⁴⁾ Includes remaining balance of POBs and any other special contributions made by the County (including Courts) or Moraga-Orinda Fire District that have been allocated to the County General cost groups or for Contra Costa Fire Protection District that have been allocated to their Safety cost group.

EXHIBIT K

Section 415 Limitations

Section 415 of the Internal Revenue Code (IRC) specifies the maximum benefits that may be paid to an individual from a defined benefit plan and the maximum amounts that may be allocated each year to an individual's account in a defined contribution plan.

A qualified pension plan may not pay benefits in excess of the Section 415 limits. The ultimate penalty for noncompliance is disqualification: active participants could be taxed on their vested benefits and the IRS may seek to tax the income earned on the plan's assets.

In particular, Section 415(b) of the IRC limits the maximum annual benefit payable at the Normal Retirement Age to a dollar limit of \$160,000 indexed for inflation. That limit is \$200,000 for 2012. Normal Retirement Age for these purposes is age 62. These are the limits in simplified terms. They must generally be adjusted based on each participant's circumstances, for such things as age at retirement, form of benefits chosen and after tax contributions. Limits are also affected by the "grandfather" election under Section 415(b)(10).

Benefits in excess of the limits may be paid through a qualified governmental excess plan that meets the requirements of Section 415(m).

Legal Counsel's review and interpretation of the law and regulations should be sought on any questions in this regard.

Contribution rates determined in this valuation have not been reduced for the Section 415 limitations. Actual limitations will result in actuarial gains as they occur.

EXHIBIT L

Definitions of Pension Terms

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial Assumptions:

The estimates on which the cost of the Plan is calculated including:

- (a) <u>Investment return</u> the rate of investment yield that the Plan will earn over the long-term future;
- (b) <u>Mortality rates</u> the death rates of employees and pensioners; life expectancy is based on these rates;
- (c) <u>Retirement rates</u> the rate or probability of retirement at a given age; and
- (d) <u>Turnover rates</u> the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.

Normal Cost:

The amount of contributions required to fund the level cost allocated to the current year of service.

Actuarial Accrued Liability For Actives:

The equivalent of the accumulated normal costs allocated to the years before the valuation date.

Actuarial Accrued Liability For Pensioners:

The single sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and of the interest that the sum is expected to earn before it is entirely paid out in benefits.

Unfunded Actuarial Accrued Liability:

The extent to which the actuarial accrued liability of the Plan exceeds the assets of the Plan.

Amortization of the Unfunded

Actuarial Accrued Liability: Payments made over a period of years equal in value to the Plan's unfunded actuarial

accrued liability.

Investment Return: The rate of earnings of the Plan from its investments, including interest, dividends and

capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the market gains and losses to avoid significant swings in the value of assets from one

year to the next.

⁽¹⁾ Excludes assets for non-valuation reserves.

⁽²⁾ Excludes liabilities for non-valuation reserves.

EXHIBIT III

Supplementary Information Required by GASB

Valuation date	December 31, 2011
Actuarial cost method	Entry Age Normal Actuarial Cost Method
Amortization method	Level percent of payroll for total unfunded liability (4.25% payroll growth assumed)
Remaining amortization period	Remaining balance of December 31, 2007 UAAL is amortized over a fixed (decreasing or closed) period with 11 years remaining as of December 31, 2011. Any changes in UAAL after December 31, 2007 will be separately amortized over a fixed 18-year period effective with that valuation.
Asset valuation method	Market value of assets less unrecognized returns in each of the last nine semi-annual accounting periods. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized semi-annually over a five-year period. The Actuarial Value of Assets is reduced by the value of the non-valuation reserves and designations.
Actuarial assumptions:	
Investment rate of return	7.75%
Inflation rate	3.50%
Projected salary increases ⁽¹⁾	General: 5.00% to 13.25%; Safety: 5.00% to 13.75%
Cost of living adjustments	3% per year except for Tier 3 disability benefits and Tier 2 benefits that are valued as a 3.50% increase per year. Safety Tier C benefits are assumed to increase at 2% per year. All increases are contingent upon actual increases in CPI.
Plan membership:	
Retired members and beneficiaries receiving benefits	8,085
Terminated members entitled to, but not yet receiving benefits ⁽²⁾	2,214
Active members	<u>8,629</u>
Total	18,928

⁽¹⁾ Includes inflation at 3.50%, plus "across the board" salary increases of 0.75%, plus merit and promotional increases. See Exhibit IV for these increases. The average total assumed salary increase for active members in the December 31, 2011 valuation is 5.8%.

⁽²⁾ Includes 834 nonvested terminated members.

EXHIBIT IV

Actuarial Assumptions and Actuarial Cost Method

Post – Retirement Mortality Rates:

Healthy: For General Members: RP-2000 Combined Healthy Mortality Table set back

three years for males and set back two years for females.

For Safety Members: RP-2000 Combined Healthy Mortality Table set back

three years for males and set back two years for females.

Disabled: For General Members: RP-2000 Combined Healthy Mortality Table set forward

four years.

For Safety Members: RP-2000 Combined Healthy Mortality Table set back two

years.

Beneficiaries: Beneficiaries are assumed to have the same mortality as a General Member of the

opposite sex who has taken a service (non-disability) retirement.

The mortality tables shown above were determined so as to reasonably reflect future

mortality improvement, based on a review of mortality experience as of the

measurement date.

Member Contribution Rates: For General Members: RP-2000 Combined Healthy Mortality Table set back three

years for males and set back two years for females weighted 30% male and 70%

female.

For Safety Members: RP-2000 Combined Healthy Mortality Table set back three years for males and set back two years for females weighted 85% male and 15%

female.

Termination Rates Before Retirement:

73	100.00	40.00	100.00	100.00
74	100.00	40.00	100.00	100.00
75	100.00	100.00	100.00	100.00

Retirement Rates (Non-enhanced):

For those members not covered under the enhanced benefit formulas the following rates apply:

Rate (%)

Kale (%)		
Age	General Tier 1	Safety Tier A
50	3.00	1.00
51	3.00	1.00
52	3.00	1.00
53	3.00	1.00
54	3.00	1.00
55	10.00	2.00
56	10.00	2.00
57	10.00	3.00
58	10.00	4.00
59	10.00	20.00
60	25.00	17.00
61	15.00	17.00
62	40.00	18.00
63	25.00	20.00
64	30.00	100.00
65	40.00	100.00
66	35.00	100.00
67	35.00	100.00
68	35.00	100.00
69	35.00	100.00
70	100.00	100.00

Retirement Age and Benefit for Deferred Vested Members:

For deferred vested benefits, we make the following retirement assumption:

General: Age 58 Safety: Age 55

We assume that 40% and 60% of future General and Safety deferred vested members, respectively, will continue to work for a reciprocal employer. For reciprocals, we assume 5.50% compensation increases per annum.

Future Benefit Accruals:

1.0 year of service per year for the full-time employees. Continuation of current

partial service accrual for part-time employees.

Unknown Data for Members:

Same as those exhibited by members with similar known characteristics. If not

specified, members are assumed to be male.

Percent Married:

75% of male members and 50% of female members are assumed to be married at preretirement death or retirement. There is no explicit assumption for children's benefits.

Age of Spouse:

Females are 3 years younger than their spouses.

Offsets by Other Plans of the Employer for Disability Benefits:

The Plan requires members who retire because of disability from General Tier 3 to offset the Plan's disability benefits with other Plans of the employer. We have not

assumed any offsets in this valuation.

Terminal Pay Assumptions:

The following assumptions for terminal pay as a percentage of final average pay are used:

	Membership Date before January 1, 2011	Membership Date on or after January 1, 2011
Cost Group 1:	12.00%	3.00%
Cost Group 2:	3.50% for Tier 2	1.00%
-	7.50% for Tier 3	
Cost Group 3:	24.00%	8.00%
Cost Group 4:	6.00%	0.75%
Cost Group 5:	12.00%	3.00%
Cost Group 6:	12.00%	3.00%
Cost Group 7:	11.25%	1.50%
Cost Group 8:	10.50%	1.25%
Cost Group 9:	3.75%	0.50%
Cost Group 10:	14.00%	1.75%
Cost Group 11	15.00%	3.50%
Cost Group 12:	16.00%	8.00%

For determining the cost of the basic benefit (i.e. non-COLA component), the cost of this pay element is currently recognized in the valuation as an employer only cost and does not affect member contribution rates.

Service From Unused Sick Leave Conversion:

The following assumptions for service converted from unused sick leave as a

percentage of service at retirement are used:

Service Retirements:

General: 1.25% Safety: 2.25%

Disability Retirements:

General: 0.25% Safety: 1.25%

Pursuant to Section 31641.01, the cost of this benefit will be charged only to employers and will not affect member contribution rates.

Net Investment Return:

7.75%, net of administration and investment expenses.

Employee Contribution

Crediting Rate:

7.75%, compounded semi-annually.

Consumer Price Index:

Increase of 3.50% per year; retiree COLA increases due to CPI subject to a 3.00% maximum change per year except for Tier 3 disability benefits and Tier 2 benefits which are subject to a 4.00% (valued as 3.50% increase) maximum change per year. Safety Tier C benefits are subject to a 2.00% maximum change per year.

Salary Increases:

Annual Rate of Compensation Increase

Inflation: 3.50% per year, plus "across the board" salary increases of 0.75% per year, plus the following merit and promotional increases.

Years of Service	General	Safety
Less than 1	9.00%	9.50%
1	6.00%	6.25%
2	4.75%	5.25%
3	3.25%	4.00%
4	2.25%	2.00%
5	1.50%	0.75%
6	1.25%	0.75%
7	1.00%	0.75%
8	0.75%	0.75%
9	0.75%	0.75%
10	0.75%	0.75%
11	0.75%	0.75%
12	0.75%	0.75%

14	0.75%	0.75%
15	0.75%	0.75%
16	0.75%	0.75%
17	0.75%	0.75%
18	0.75%	0.75%
19	0.75%	0.75%
20 & over	0.75%	0.75%

SECTION 4: Reporting Information for the Contra Costa County Employees' Retirement Association

Actuarial Value of Assets:	Market value of assets less unrecognized returns in each of the last nine semi-annual accounting periods. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized semi-annually over a five-year period.
Valuation Value of Assets:	Actuarial Value of Assets reduced by the value of the non-valuation reserves and designations.
Actuarial Cost Method:	Entry Age Normal Actuarial Cost Method. Entry Age is calculated as age on the valuation date minus years of service. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percent of compensation, with Normal Cost determined as if the current benefit accrual rate had always been in effect.
Changes in Actuarial Assumptions and Methods:	There have been no changes in actuarial assumptions since the previous valuation.

EXHIBIT V

Summary of Plan Provisions

This exhibit summarizes the major provisions of the Plan included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Membership Eligibility:

General Tier 1 All General members hired before July 1, 1980 and electing not to transfer to Tier 2

Plan. Certain General members who are hired after July 1, 1980 and work for specific

employers are placed in Tier 1.

General Tier 2 Most General members hired on or after August 1, 1980 and all General members

hired before July 1, 1980 electing to transfer to the Tier 2 Plan. Effective October 1, 2002, for the County, Tier 2 was eliminated and all County employees (excluding CNA employees) in Tier 2 were placed in Tier 3. Effective January 1, 2005, all CNA

employees in Tier 2 were placed in Tier 3.

General Tier 3 Tier 2 members can elect Tier 3 coverage (for future service) effective on the later of:

October 1, 1998 or the day after achieving 5 years of service. All County General members (excluding CNA employees) hired on or after October 1, 2002 will be placed in Tier 3. All CNA employees hired after January 1, 2005 were placed in

Tier 3.

Safety All Safety members. All County Sheriff's Department Safety members hired on or

after January 1, 2007 will be placed in Safety Tier C Enhanced.

Final Compensation for Benefit Determination:

General Tier 1, Tier 3 (non-disability),

and Safety Tier A Highest consecutive twelve months of compensation earnable. (FAS1)

General Tier 2, Tier 3 (disability),

and Safety Tier C Highest consecutive thirty-six months of compensation earnable. (FAS3)

Note: For members with membership dates on or after January 1, 2011, certain terminal pay elements are no longer included in the determination of compensation for

retirement purposes.

Social Security Primary Insurance Amount:

General Tier 2 Estimated Social Security award at age 62 assuming level future earnings. (PIA)

Service:

General Tier 1 and 3 and Safety Years of service. (Yrs)

General Tier 2 Years of service up to a maximum of 30 years. (Yrs30)

Service Retirement Eligibility:

General Age 50 with 10 years of service, or age 70 regardless of service, or after 30 years of

service, regardless of age.

Safety Age 50 with 10 years of service, or age 70 regardless of service, or after 20 years of

service, regardless of age.

Benefit Formula:

General Tier 1 and Tier 3 (Non-		
enhanced)(§31676.11)	Retirement Age	Benefit Formula
	50	(1.24% x FAS1 - 1/3 x 1.24% x \$350 x 12) x Yrs
	55	(1.67%xFAS1-1/3x1.67%x\$350x12)xYrs
	60	(2.18% x FAS1 - 1/3 x 2.18% x \$350 x 12) x Yrs
	62	(2.35% x FAS1 - 1/3 x 2.35% x \$350 x 12) x Yrs
	65	(2.61% x FAS1 - 1/3 x 2.61% x \$350 x 12) x Yrs
Maximum Benefit: 100% of FAS1		
General Tier 2 (§31752)	50	(0.83%xFAS3xYrs – 0.57%xYrs30xPIA)
	55	(1.13% xFAS3xYrs - 0.87% xYrs30xPIA)
	60	(1.43% xFAS3xYrs - 1.37% xYrs30xPIA)
	62	(1.55%xFAS3xYrs – 1.67%xYrs30xPIA)
	65	(1.73% xFAS3xYrs - 1.67% xYrs30xPIA)

Benefit Formula:

Safety Tier A (Non-enhanced)(§31664)	50	(2.00% xFAS1xYrs)
	55	(2.62%xFAS1xYrs)

Maximum Benefit: 100% of FAS1

General Tier 1 and Tier 3 (Enhanced) (§31676.16)	Retirement Age	Benefit Formula
	50	(1.43% x FAS1 - 1/3x1.43% x \$350x12) x Yrs
	55	(2.00% x FAS1 - 1/3x 2.00% x \$350x 12)x Yrs
	60	(2.26% x FAS1 - 1/3x 2.26% x \$350x 12)x Yrs
	62	(2.37% x FAS1 - 1/3 x 2.37% x \$350 x 12) x Yrs
	65	(2.42% xFAS1 - 1/3x2.42% x\$350x12)xYrs

For members previously covered under the non-enhanced §31676.11 formula, they are entitled to at least the benefits they could have received under §31676.11.

Maximum Benefit: 100% of FAS1

Safety Tier A (Enhanced)(§31664.1) 50 (3.00%xFAS1xYrs)

Maximum Benefit: 100% of FAS1

Safety Tier C (Enhanced)(§*31664.1)* 50 (3.00%xFAS3xYrs)

Maximum Benefit: 100% of FAS3

Ordinary Disability:

General Tier 1

Eligibility Five years of service (§31720).

Benefit Formula 1.5% per year of service. If the benefit does not exceed one-third of Final

Compensation, the service is projected to 65, but total benefit cannot be more than

one-third of Final Compensation (§31727).

General Tier 2 and General Tier 3

Eligibility Ten years of service (definition of disability is more strict than Tier 1 Plan)

(§31720.1).

Benefit Formula 40% of Final Compensation plus 10% of Final Compensation used in the benefit

determination for each minor child (maximum of three) (§31727.01).

Offset Disability benefits are offset by other plans of the employer except Workers

Compensation and Social Security.

<u>Safety</u>

Eligibility Five years of service (§31720).

Benefit Formula 1.8% per year of service. If the benefit does not exceed one-third of Final

Compensation, the service is projected to 55, but total benefit cannot be more than

one-third of Final Compensation (§31727.2).

Line-of-Duty Disability:

General Tier 1 and Safety

Eligibility No age or service requirements (§31720).

Benefit Formula 50% of the Final Compensation (§31727.4).

General Tier 2 and General Tier 3

Eligibility No age or service requirements (§31720).

Benefit Formula 40% of Final Compensation plus 10% of Final Compensation for each minor child

(maximum of three) (§31727.01).

Offset Disability benefits are offset by other plans of the Employer except Workers

Compensation and Social Security.

Pre-Retirement Death:

General Tier 1 and Tier 3, and Safety

Eligibility - A None.

Benefit - A Refund of employee contributions with interest plus one month's compensation for

each year of service to a maximum of six month's compensation (§31781); 50% of

Final Compensation payable to spouse if Line of Duty death (§31787).

OR

Eligibility - B Five years of service (Ten years for Tier 3).

Benefit - B Option 2 (100% continuation) of Service Retirement or Ordinary Disability benefit

payable to designated beneficiary.

Death in line of duty 50% of Final compensation.

General Tier 2

Eligibility - A None.

Benefit - A Refund of employee contributions with interest plus \$2,000 lump sum benefit offset

by any Social Security payment. (§31781.01); If a Line of Duty death, then 60% of

Service or Disability Retirement Benefit (minimum benefit is 24% of Final

Compensation) plus, for each minor child, 10% of the allowance otherwise paid to the member. Minimum family benefit is 60% of the member's allowance. Maximum

family benefit is 100% of member's allowance.

OR

Eligibility - B Ten years of service.

Benefit - B Option 2 (100% continuation) of Service Retirement or Ordinary Disability benefit

payable to designated beneficiary.

Death After Retirement:

General Tier 1 and Tier 3, and Safety

Service or

Ordinary Disability Retirement 60% of member's unmodified allowance continued to eligible spouse. An eligible

spouse is a surviving spouse who was married to the member one year prior to member's retirement or at least two years prior to the date of death and has attained age 55 on or prior to the date of death (§31760.2). An additional lump sum benefit of

\$5,000 is payable to the member's beneficiary (§31789.12).

Line-of-Duty Disability 100% of members allowance continued to eligible spouse (§31786). An additional

lump sum benefit of \$5,000 is payable to the member's beneficiary (§31789.12).

General Tier 2

Service or

Disability Retirement 60% of member's unmodified allowance continued to eligible spouse plus 10% of

allowance to each minor child. Minimum benefit is 60% of allowance. Maximum benefit is 100% of allowance. \$7,000 lump sum benefit, less any Social Security

Lump sum payment payable to member's beneficiary.

Withdrawal Benefits:

Less than Five Years of Service Refund of accumulated employee contributions with interest, or earned benefit at age

70 (§31628).

Five or More Years of Service If contributions left on deposit, entitled to earned benefits commencing at any time

after eligible to retire (§31700).

Post-Retirement

Cost-of-Living Benefits:

General Tier 1 and Tier 3, and Safety

Tier A Future changes based on Consumer Price Index to a maximum of 3% per year, excess

"banked." Tier 3 disability benefits have a maximum of 4% per year, excess

"banked."

General Tier 2 Future changes based on Consumer Price Index to a maximum of 4% per year, excess

"banked."

Safety Tier C Future changes based on Consumer Price Index to a maximum of 2% per year, excess

"banked."

County Contributions: Determined by the Entry Age Normal Cost method. The remaining balance of the

December 31, 2007 Unfunded Actuarial Accrued Liability (UAAL) is amortized as a level percent of payroll over a declining period with 11 years remaining as of December 31, 2011. Any change in the UAAL that arises at each valuation after

December 31, 2007 is amortized over its own separate declining 18-year period.

Member Contributions: Please refer to Appendices A and B for the specific rates.

General Tier 1 and Tier 3 (Non-enhanced)

Basic Provide for one-half of the §31676.11 benefit payable at age 55.

Cost-of-Living Provide for one-half of future Cost-of-Living costs.

Safety Tier A (Non-enhanced)

Basic Provide for one-half of the §31664 benefit payable at age 50.

Cost-of-Living Provide for one-half of future Cost-of-Living costs.

General Tier 1 and Tier 3 (Enhanced)

Basic Provide for an average annuity at age 60 equal to 1/120 of FAS1.

Cost-of-Living Provide for one-half of future Cost-of-Living costs.

Member Contributions (continued):	
Safety Tier A (Enhanced)	
Basic	Provide for an average annuity at age 50 equal to 1/100 of FAS1.
Cost-of-Living	Provide for one-half of future Cost-of-Living costs.
Safety Tier C (Enhanced)	
Basic	Provide for an average annuity at age 50 equal to 1/100 of FAS3.
Cost-of-Living	Provide for one-half of future Cost-of-Living costs.
Other Information:	Transfers from the Tier 1 Plan to the Tier 2 Plan were made on an individual voluntary irrevocable basis. Credit is given under the Tier 2 Plan for future service only. The Cost-of-Living maximum is 4% only for the credit under the Tier 2 Plan. Transferred Tier 2 Plan members keep the five-year requirement for nonservice-connected disability. Those who were members on or before March 7, 1973 and all safety members under the enhanced benefit formula will be exempt from paying member contributions after 30 years of service.
Plan Amendments:	There have been no changes in plan provisions since the previous actuarial valuation.
Plan Provisions Not Valued:	Additional \$5,000 lump sum post-retirement death benefit payable to a member's beneficiary. This benefit is paid from a reserve that is not included in the Valuation Value of Assets and is subject at all times to the availability of funds.

NOTE: The summary of major plan provisions is designed to outline principal plan benefits as interpreted for purposes of the actuarial valuation. If the Association should find the plan summary not in accordance with the actual provisions, the Association should alert the actuary so that both can be sure the proper provisions are valued.

Appendix A

Member Contribution Rates for Members with Membership Dates before January 1, 2011

General Tier 1 (Non-enhanced) Members' Contribution Rates for Members Not Receiving Benefits under 2% at 55 Formula (Expressed as a Percentage of Monthly Payroll)

60	11.65%	8.10%	19.75%

Interest: 7.75%

Salary Increase: See Exhibit IV.

COLA Loading: 69.54%

Mortality: RP-2000 Combined Healthy Mortality Table (85% Male and 15% Female, with ages set back three years

for males and two years for females)

These rates exclude up to an extra 9% of compensation (depending on their MOU) that most Safety Tier

A (Enhanced) members contribute that reduces the employer's contribution rate.

Safety Tier C (Enhanced) Members' Contribution Rates for Members Receiving Benefits under 3% at 50 Formula (Expressed as a Percentage of Monthly Payroll)

For Members with Membership Dates on or after January 1, 2011
